
When the movie was introduced, it received tremendous success. On March 14, 2016- 2 years after its release- Google released an app for the movie "life of pi". The app has been downloaded over 8 million times! Life of pi is now available in many languages like Spanish, Hindi and Arabic. Life of pi is a story about Piscine Molitor Patel (Pi), an Indian boy who ends up on a lifeboat with only one other survivor after his boat capsizes during his first trip at sea. The remarkable journey that follows takes Pi from India to Mexico to Canada and finally back to India again—with no other humans anywhere along the way. As Pi is forced to come face-to-face with the reality of human sorrow and animal brutality, he begins to imagine that God is an all-powerful and merciful entity that helps and rescues those who help and rescue themselves in the wake of danger. "Life of Pi" is a 2011 American 3D fantasy adventure film directed by Ang Lee and written by David Magee based on Yann Martel's 2002 novel "Life of Pi". The film stars Suraj Sharma, Irrfan Khan, Rafe Spall, Adil Hussain, Tabu, Gbenga Odusanya, A. J. Cook and Jared Gilman. It was released on November 22, 2011 by DreamWorks Pictures. At the 2011 Film Independent Spirit Awards, the film won the award for Best First Feature. In February 2012, "Life of Pi" grossed over \$273 million internationally and over \$200 million in North America. The film's success led to a 3D re-release in November 2012 and adding a reissue to its February 2013 home media release. Life of Pi appeared on many critics' top ten lists of best films of 2011. The film also received Academy Award nominations for Best Director, Best Picture, and Best Adapted Screenplay. In 2016, Google released an app for Life of Pi. It has been downloaded over 8 million times. The film is based on the 2001 novel by Yann Martel published by Knopf Canada. The visual effects are done by Rhythm & Hues Studios, whose legal name is now Rhythm & Hues Studios, LLC. The company filed for Chapter 11 bankruptcy protection in September 2012. The film was shot, primarily in 3D, using the digital 3D Fusion Camera System (developed by Stereo D). It made use of nature's beauty in each setting to create visual depth and atmosphere, such as using the sun to create shadows in certain scenes. Other ILM effects shots include split screen and panoramic effects, creating a more cinematic image. Despite the film's "3D" sticker, DreamWorks did not film with 3D cameras; full 3D conversion for all scenes was done in post-production. The film made extensive use of natural lighting: it uses the reflection of the sun off water and rippling ocean waves to represent light beams from prisms, creating a surreal underwater-esque effect.
